

RONIT AHUJA

AI Assisted Developer

+918422040493 @ronitahuja.0510@gmail.com <https://www.linkedin.com/in/ronitahujadev/> MUMBAI

SUMMARY

Aspiring Software Developer and IT undergraduate with hands-on experience building web and application-based projects using modern development technologies. Interested in developing scalable, user-centric solutions while continuously strengthening skills in full-stack development, system design, and AI-assisted software engineering. Eager to learn, adapt to emerging technologies, and contribute to innovative products at the intersection of software development and artificial intelligence.

INTERNSHIPS

Attendance Management System

Vivekanand Education Society's Institute Of Technology

08/2026 - Present Mumbai

- Engineered a cross-platform attendance management platform supporting student and faculty workflows across academic sessions.
- Designed automated attendance-session workflows to reduce manual administration and improve operational consistency.
- Implemented proxy-prevention and session-validation mechanisms to strengthen attendance integrity and prevent unauthorized submissions.
- Developed real-time notifications, attendance tracking, and faculty reporting workflows to improve attendance visibility and compliance.
- Structured scalable, role-based workflows supporting approximately 80 students across 20 classrooms.

Catalogue Management System

Kingstar Enterprises

02/2025 - 03/2025 Mumbai

- Developed a B2B catalogue management platform using modern frontend and backend technologies.
- Implemented product categorization, catalogue organization, and advanced filtering for efficient product discovery.
- Built administrative workflows for managing products, categories, and catalogue content.
- Integrated enquiry and business communication workflows to support B2B interactions.
- Developed a responsive interface focused on usability, maintainability, and catalogue scalability.

EDUCATION

Bachelor's of technology (IT)

Vivekanand Education Society's Institute Of Technology

09/2024 - Present Mumbai, India

SKILLS

Full-Stack Development

AI Coding Agents BMAD Framework

Backend & API Development

Database Management

Cross-Platform Development

Git & GitHub

PROJECTS

FlowLane

- Engineered a collaborative task management platform integrating Google Sign-In and Calendar API for seamless schedule synchronization. Built interactive, drag-and-drop Kanban workflows supporting real-time multi-user collaboration and priority-based task categorization.

Budgetify

- Engineered a comprehensive personal finance application featuring an AI Financial Advisor for intelligent budget planning and personalized spending insights.

Menti Math

- Engineered a competitive mental-math web game featuring a real-time Global Leaderboard and seamless Google (Gmail) authentication, allowing users to compete directly with friends and family.
- Implemented adaptive difficulty scaling and complex performance-based scoring algorithms within a highly optimized, minimalist UI.
